***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on July 8<sup>th</sup> 2005 has been entered.

***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on July 8<sup>th</sup> has been considered by the examiner.

***Allowable Subject Matter***

3. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 17-27 are found to be in condition for allowance.

### ***Reasons for Allowance***

4. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a converting method and apparatus comprising converting means for converting a stored content into format suitable for a terminal based on a content-information signal and an information obtained in a first obtaining means, wherein the content-information signal includes coding difficulty information indicating a coding difficulty of the content, wherein the coding difficulty is a function of a sum of a difficulty of each segment of the content and a sum of a difficulty of each sequence of the content, and the converting means converts the content based on the coding difficulty information.

It is noted that the closest prior art of record (Zhang et al. US Patent no. 6,181,711) teaches a similar converting apparatus and method, however, Zhang et al. fails to particularly teach or suggest *"content-information signal including coding difficulty information indicating a coding difficulty of the content, wherein the coding difficulty is a function of a sum of a difficulty of each segment of the content and a sum of a difficulty of each sequence of the content, and the format converting means converts the content based on the coding difficulty information"* as specified in the claims.

### ***Conclusion***

issue fee. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance".
